Sherfield Oaks has a new vision

New head green keeper Rob Patton moves to Sherfield Oaks

April 2022 - An exciting time of change for Sherfield Oaks Golf Club, based in Basingstoke, as Rob Patton brings his eager eyes to their 36 hole golf complex.

Rob brings a wealth of experience from the highest level, having most recently project managed a golf course development in Saudi Arabia. Previous to this, Rob spent time at the prestigious and elite level Beaverbrook Golf Club where he worked alongside Ross Jones - our Group Course Maintenance Director.

“Having worked with Rob at Beaverbrook GC I am fully aware of his capabilities. With over a decade of experience in the industry Rob brings a wealth of knowledge with him and I am excited to see his vision for the course. With various construction experience under his belt including Beaverbrook which at the time was the most expensive course build in Europe and currently heading up a grow in in Saudi for the STRI Rob will ensure all project work runs smoothly and is finished to the highest standards. I look forward to seeing Rob develop his talents further under Get Golfing and I’m excited to see where he can take Sherfield Oaks. The future is bright.” Ross Jones, Director of course maintenance.”

Rob is super excited to be joining the team at Sherfield Oaks. “ Following a site visit with Ross Jones to Sherfield I can really see the potential in the site. Hearing the upcoming project work and investments excite me and I look forward to developing the course further. With my experience at high level courses around the world and the support from Get Golfing I feel we can really elevate the standards at Sherfield, I look forward to my future at the club.” Rob Patton, Course Manager, Sherfield Oaks GC.

It’s an exciting time for Sherfield Oaks as they prepare for another busy golfing season. Get Golfing are fully supportive of this new venture as currently there are some new machines on their way to the site as well as a push in recruitment, including apprentices. There will be challenges ahead for Rob including size of the site, climate and staffing experience, however Rob will be fully supported in all areas.
